Summary

Java Full-Stack Developer fresher with a solid understanding of frontend and backend technologies. Experienced in creating responsive UIs using HTML, CSS, JavaScript, and developing backend services using Java, Spring Boot, and SQL. Seeking opportunities to work on real-world full-stack applications.

Skills

Programming & Backend: Java, OOP Concepts
Frontend: HTML, CSS, JavaScript
Tools: Git, GitHub

Projects

Smart Task Manager | *Java, Javascript, Spring Boot*
- **Built a full-stack task management application** supporting user authentication and CRUD operations for tasks.
- Developed RESTful APIs using Spring Boot to handle task creation, updates, deletion, and status tracking.
- Designed responsive UI using React, HTML, CSS, and JavaScript for seamless task interaction.
- Implemented task filtering by status (Pending, In-Progress, Completed), improving task tracking efficiency.

Job Portal Web Application | *Java, Javascript, Spring Boot, SQL*
- **Developed a full-stack job portal** enabling recruiters to post jobs and users to browse and apply.
- Implemented backend services using Spring Boot and MySQL for job listings and application management.
- Integrated REST APIs between frontend and backend to enable real-time job listing updates.
- Strengthened understanding of client-server architecture and full-stack application flow.

Professional Strengths

- Strong understanding of Java fundamentals and application flow.
- Quick learner with the ability to adapt to new frameworks and tools.
- Comfortable working in team-based development environments.

Education

B.E Computer Engineering   **Graduated: 2022**
KBC NMU, Maharashtra   *CGPA: 8.2 / 10*
